ENTERPRISE RESOURCE PLANNING

Connecting Business Targets to Actionable Initiatives

Info-Tech's Research-Backed Consultants Can Guide You on This Journey to ERP Success.

Enterprise resource planning (ERP) strategy is a roadmap that provides a clear path to enterprise benefits realization. The trouble is that organizations often don't put a strategy in place, instead focusing on selection and implementation. Without a strategy, projects routinely run over time and over budget and fail to meet business objectives..but their failure could have been prevented.

With the right roadmap, ERP can help business targets become actionable initiatives and would-be failures become resounding successes.

Consider This:

64% — 64% of ERP projects go over budget.

55% — 55% of ERP projects fail to achieve their planned business objectives.

Our ERP Strategies Will Enable Your Organization To:

- ✔ Drive competitive advantage
- ✔ Align ERP and corporate strategies
- ✔ Secure stakeholder consensus
- ✔ Avoid overspending and underutilization
- ✔ Better serve customers
- ✔ Increase efficiencies
- ✔ Mitigate risk
- ✔ Actualize ROI

Our Approach: **How Our Consultants Develop ERP Strategies**

Analysis

Perform a high-level current-state assessment

Identify key business processes and capabilities

Asses maturity of processes

Identify pain points and opportunities for improvement

Strategy

Construct a clear vision statement and guiding principles

Define future-state considerations

Align the ERP strategy with the business strategy

Identify strategy alternatives

Define risks and risk-mitigation activities

Delivery

Deliver an actionable ERP roadmap, executive summary, and high-level business case

Create a governance charter to guide the governance of the roadmap
